

Outstanding Staffing Solutions

WHEN YOU WANT TO HIRE THE BEST

Need to hire a large number of people in a short period of time? No longer have the resources to go through a large volume of resumes? Let A-1 Temps come to the rescue with one of our recruiting solutions.

Our Outsource option allows you to offload the whole recruiting function to us. You give us your hiring criteria, including any special evaluations or qualifications and we will advertise, screen, and then place the best employees available at your facility. You have the option of taking that employee available at your facility. You have the option of taking that employee to hire option and trying the employee on our payroll before making the commitment to place on yours.

Best of all, we design a screening process and hiring process around what's important to your company. We can do it for less expense because this is what we do every day. We have agreements already in place for recruiting advertising, and we constantly generate recruits with our in-house referral plan, website, and client referral network. Many companies come and go in Florida because it is a unique business environment. It helps that we are a Florida based company with branches throughout Central Florida and we have been in the temporary and staffing business since 1989.

A-1 Temps offers personal attention and service- we are a hands-on and consumer friendly service. We pre-test, pre-screen, do background checks and qualify our employees before we send our employees out on assignment.

A-1 Temps gives quick and concerned response to your needs. Safety is a large concern of ours. We can provide your company with access to our safety officers free of charge.
